Using Canvas with Pre-K
Best Practices

Emojis & Graphics

Using Emojis and graphics in your Canvas course helps students identify what they need to do. These young learners are just beginning to read, adding these graphics will not only help them see what to select but also helps them recognize words associated with that graphic.

New Quizzes

New Quizzes is a great assessment tool in Canvas. One question type, Hot Spot, allows the learner to just select the appropriate picture by using their mouse or finger (if using a touch screen device.)
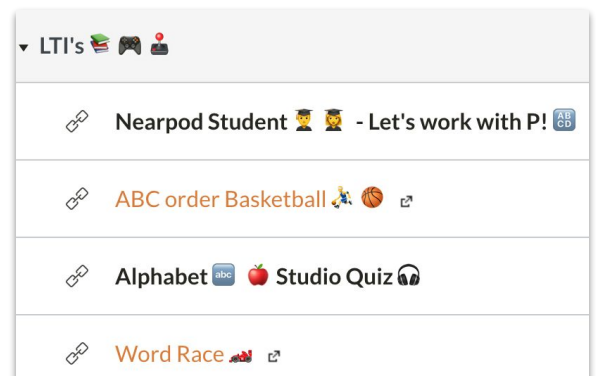

Select the yellow shape.

Voice recording

In Canvas, you can add voice recordings to most features! This includes but not limited to, information on a page, and instructions on an assignment. Use other voice recording tools to add to questions in New Quizzes! This helps our little learners understand what is being asked and begin to recognize words.

LTI's

Use Canvas as a One-Stop-Shop to house all of the resources and games you use with your students! From Nearpod to Smart Learning Suite games, Canvas is an excellent place to keep them all together for easy access for our little learners in the classroom and at home!
